

MQ7[®]+ K2-SuperVitaminComplex

MQ7[®]+ Health supplement K2-SuperVitaminComplex

MAINTAINS WELLBEING, HEALTHY BONES AND HEART

Sources of Vitamin K2 MK-7:

Human cells are not able to synthesize Vitamin K₂. In order to obtain 90 mcg of Vitamin K₂ daily - which MQ7[®]+ delivers in one tablet - one would have to consume daily, either:

8 kg of meat

10 l of milk

approximately
16 egg yolks

10 l of yoghurt

120 g hard
cheese

Our product is not intended to prevent, cure, treat, or diagnose any disease. Absolutely none of the statements in this flyer should be construed as medical advice. We recommend all people to consult a licensed health care professional before starting any dietary or exercise program.

IMPORTANT:

Consult a healthcare professional prior to use if you are taking anticoagulants such as warfarin. Excessive consumption may lead to laxative effects. This product is not intended for pregnant women or children. Keep out of children's reach.

RECOMMENDATIONS FOR USE:

One tablet daily, morning or evening or as advised by a healthcare professional. Does not contain hormones, phytoestrogens, gluten, beta carotene or lactose. This product does not contain any substances derived from pork or beef. Suitable for vegetarians.

PRESENTATION: Box of 60 tablets / 2 month supply

In this special combination of MQ7[®]+ we also have:

VITAMIN B6:

Supports metabolism to lift energy levels and reduces fatigue.

VITAMIN E:

An anti-oxidant, Vitamin E supports healthy skin and eyes, and a healthy immune system.

VITAMIN C:

An anti-oxidant, Vitamin C supports the immune system. It is necessary for the growth, development and supports repair of body tissues.

Are you concerned
with:

- maintaining strong and healthy bones?
- maintaining a healthy heart?
- your calcium metabolism?

MQ7[®]+

Is the innovative way
to maintain
healthy bones and heart

MQ7[®]+ K2-SuperVitaminComplex

Our unique combination of vitamins, coenzymes and antioxidants has been formulated to maintain healthy bones and a healthy cardiovascular system. In addition, **MQ7[®]+** provides antioxidants, lifts energy levels and balances life's nutrition to assist in healthy ageing.

Both women and men lose calcium when they become older. From the age of 35, we are losing bone mass. As women age and enter menopause, they simultaneously lose calcium from bone. This may increase the risk of osteoporosis if they do not replenish the lost calcium.

MQ7[®]+ is a unique combination of:

VITAMIN K₂ as MK-7:

A form of highly bioavailable **Vitamin K₂** that contributes to the maintenance of bone structure. Activates osteocalcin, the major protein in bone metabolism.

VITAMIN D₃

Helps calcium absorption in the body and mobilizes calcium in the bone matrix.

CoQ10

Support for the heart to maintain energy for the body. Supports energy levels and general health.

How does MQ7[®]+ maintain healthy bones and heart?

Bone and cardiovascular health depend on how the body utilizes calcium, ideally the body will bind calcium to the bone mineral matrix, making stronger and denser bones.

MQ7[®]+ helps to bind calcium from the bloodstream to the bone matrix. The process is enabled by calcium-binding proteins called "osteocalcin" and matrix GLA ("MGP"). To function properly, these proteins need to undergo a process called "carboxylation" which is dependant on the presence of **MK-7**.

Very simply put, **Vitamin K₂** is the body's light switch. It activates or "turns on" important proteins in the body, such as osteocalcin for strong bones and MGP for heart health.

The human body needs calcium to maintain healthy bones. **Vitamin K₂ MK-7**, is an essential nutrient to direct calcium into the bones, where it belongs - in order to maintain healthy and strong bones.

MQ7[®]+ enables calcium absorption with **Vitamin K₂ MK-7** (Menaquinone 7).

MQ7[®]+ helps to improve calcium absorption
